The services and facilities of the Maryland State Department of Health and Mental Hygiene (DHMH) are operated on a non-discriminatory basis. This policy prohibits discrimination on the basis of race, color, sex, or national origin and applies to the provisions of employment and granting of advantages, privileges and accommodations.

The Department, in compliance with the Americans With Disabilities Act, ensures that qualified individuals with disabilities are given an opportunity to participate in and benefit from DHMH services, programs, benefits and employment opportunities.

17. Number and Percentage of Births to Unmarried Women by Birth Order and Race of Mother, Maryland, 1994 68

18. Number of Live Births by Maternal Age, Race and Educational Attainment, Maryland,1994 69

19. Number and Percentage of Births to Women Receiving First Trimester Prenatal Care and Number and Percentage of Births to Women Receiving Late or No Prenatal Care by Race, Region and Political Subdivision, Maryland, 1994 70

20. Births by Birth Weight, Race of Mother and Onset of Prenatal Care, Maryland, 1994 71

21. Number and Percentage of Births of Low Birth Weight and Number and Percentage of Births of Very Low Birth Weight by Race of Mother, Region and Political Subdivision, Maryland, 1994 72

22. Single and Plural Births by Birth Weight and Race of Mother, Maryland, 1994 73

23. Births by Month of Birth, Race of Mother and Sex, Maryland, 1994 73

24. Births by Plurality, Race of Mother and Length of Pregnancy, Maryland, 1994 74

25. Number and Percentage of Live Births Delivered by Cesarean Section by Region and Political Subdivision, Maryland, 1994 75

26. Number of Live Births by Maternal Age, Race and Method of Delivery, Maryland, 1994 76

27. Births by Place of Residence, Place of Occurrence, Race of Mother, Region and Political Subdivision, Maryland, 1994 77

28. Births to Residents of Maryland and Births Occurring in Maryland by Area of Residence and Area of Occurrence, 1994 78

Fetal and Infant Mortality

29. Infant Deaths and Infant Mortality Rates by Race, Maryland, 1940-1994 81

30. Neonatal Deaths and Neonatal Mortality Rates by Race, Maryland, 1940-1994 81

31. Postneonatal Deaths and Postneonatal Mortality Rates by Race, Maryland, 1940-1994 82

32. Fetal Deaths and Fetal Mortality Rates by Race, Maryland, 1940-1994 82

33. Infant Deaths and Infant Mortality Rates by Race, Region and Political Subdivision, Maryland, 1994 83

34. Neonatal Deaths, Neonatal Mortality Rates and Perinatal Death Rates by Race, Region and Political Subdivision, Maryland, 1994 84

35. Fetal Deaths and Fetal Death Rates by Race, Region and Political Subdivision, Maryland, 1994 85

Mortality

36. Deaths and Death Rates by Race, Maryland, 1940-1994 89

37. Death Rates Per 100,000 Population for All Causes of Death by Race, Sex and Age, Maryland, 1994 90

38. Age-Adjusted Death Rate Per 100,000 Population for Selected Causes of Death by Race and Sex, Maryland, Selected Years, 1940-1994 91

39. Deaths and Death Rates by Race, Region and Political Subdivision, Maryland, 1994 95

40. Deaths by Month of Death and Race, Maryland, 1994 96

41. Deaths and Death Rates by Age, Sex and Race, Maryland, 1994 96

42. Deaths and Death Rates for Fifteen Leading Causes by Sex and Race, Maryland, 1994 97

43A. The Eight Leading Causes of Death by Age, Maryland, 1994 98

43B. The Eight Leading Causes of Death by Race and Age, Maryland, 1994 99

43C. The Eight Leading Causes of Death by Sex and Age, Maryland, 1994 100

43D. The Eight Leading Causes of Death Among Males by Race and Age, Maryland, 1994 101

43E. The Eight Leading Causes of Death Among Females by Race and Age, Maryland, 1994 102

44. Leading Causes of Death Among Adolescents by Age, Race and Sex, Maryland, 1994 103

45. Number of Violent Deaths Among Adolescent Ages 10-19 by Cause of Death, Race, Region and Political Subdivision, Maryland, 1994 104

46. Deaths From 73 Selected Causes by Age, Maryland, 1994 105

47. Number of Deaths and Death Rates From Selected Subcategories of Malignant Neoplasms by Race and Sex, Maryland, 1994 110

48. Deaths from Selected Causes by Region and Political Subdivision, Maryland, 1994 111

49. Death Rates for Selected Leading Causes by Region and Political Subdivision, Maryland, 1994 116

50. Three-Year Average Age Adjusted Death Rates for Selected Causes by Region and Political Subdivision, Maryland, 1990-1994 117

51. Accidental Deaths by Type of Accident, Sex and Age, Maryland, 1994 118

52. Deaths Occurring in Institutions by Race, Region and Political Subdivision, Maryland, 1994 119

53. Deaths by Place of Residence and Place of Occurrence by Race, Region and Political Subdivision, Maryland, 1994 120

54. Deaths to Residents of Maryland and Deaths Occurring in Maryland by Area of Residence and Area of Occurrence, 1994 121

Marriages

55. Marriages by Resident Status and Type of Ceremony, Maryland, 1940-1994 125

56. Marriages by Resident Status and Type of Ceremony by Region and Political Subdivision of Occurrence, Maryland, 1994 126

57. Marriages by Age and Previous Marital Status of Bride, Maryland, 1994 127

58. Marriages by Age and Previous Marital Status of Groom, Maryland, 1994 127

59. Marriages by Age of Bride and Age of Groom, 1994 128

60. Marriages by Previous Marital Status and Residence of Bride, Maryland, 1994 130

61. Marriages by Previous Marital Status and Residence of Groom, Maryland, 1994 130

62. Marriages by Previous Marital Status of Bride and Groom and Type of Ceremony, Maryland, 1994 131

63. Marriages by Place of Residence of Bride and Groom, Maryland, 1994 132

Divorces

64. Absolute Divorces and Annulments by Legal Grounds for Decree, Maryland, 1940-1994 135

65. Absolute Divorces and Annulments by Legal Grounds for Decree, Region and Political Subdivision of Occurrence, Maryland, 1994 136

66. Absolute Divorces and Annulments by Party to Whom Decree Was Granted, Selected Areas of Occurrence, Maryland, 1994 137

67. Absolute Divorces and Annulments by Place Where Marriage Was Performed, Selected Areas of Occurrence, Maryland, 1994 137

68. Absolute Divorces and Annulments by Age of Husband and Wife at Time of Decree, Maryland, 1994 138

69. Absolute Divorces and Annulments by Number of Children Reported Under 18 Years of Age and Duration of Marriage, Maryland, 1994 139

70. Absolute Divorces and Annulments by Number of Marriages of Husband and Number of Marriages of Wife, Maryland, 1994 139

Comparative Vital Statistics

72. Selected Mortality Data by Race for Maryland and the United States, 1984-1994 145

DEFINITIONS AND EXPLANATORY NOTES

The birth and death data contained in this report are presented on a county of residence basis, regardless of where the vital event occurred, unless specifically noted otherwise. Information on marriages and divorces is limited only to events occurring in Maryland.

DEFINITIONS

Age-adjustment: A methodology used to compare rates among populations with differing age distributions. The direct method of age-adjustment was used to calculate the rates in this report. In this way, the crude death rate for each age group is multiplied by the proportion of the standard population within that age group; the sum of the products is the age-adjusted rate. Age-adjusted rates in this report are standardized to the 1940 U.S. population and are expressed as rates per 100,000 population. Age-adjusted rates should not be compared to crude rates or to adjusted rates calculated using a different standard population.

Birth rate: Number of live births per 1,000 population.

Death rate: Number of deaths from all causes per 1,000 or per 100,000 population. Death rates for specific causes are per 100,000 population

Fetal death*: Death before the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy; the death is indicated by the fact that after such separation, the fetus does not breathe or show any evidence of life, such as beating of the heart, pulsation of the umbilical cord or definite movement of voluntary muscles.

Fetal mortality rate: Number of reportable fetal deaths per 1,000 total births. Total births include live births plus fetal deaths of twenty or more weeks gestation.

Infant death: Death occurring to a person under age one.

Infant mortality rate: Number of infant deaths per 1,000 live births.

Length of pregnancy: A measure of the duration of gestation in completed weeks, as calculated from the first day of the last normal menstrual period to the date of birth.

Live birth*: The complete expulsion extraction from its mother of a product of human conception, irrespective of the period of gestation, which, after such separation, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord or definite movement of voluntary muscle, whether or not the umbilical cord has been cut or the placenta is attached.

Life expectancy: The average number of years of life remaining for an individual of a particular age group.

Low birth weight: A live birth weighing under 2,500 grams (5 1/2 pounds).

Maternal mortality rate: Number of maternal deaths per 100,000 live births.

Mortality rate: See 'death rate.'

Neonatal death: Death occurring to a person under 28 days of age.

Neonatal mortality rate: Number of neonatal deaths per 1,000 live births.

Perinatal death: Death occurring after twenty weeks of gestation but before 28 days after birth. The perinatal deaths included in this report are, therefore, the sum of the reportable fetal deaths (fetal deaths after 20 weeks gestation) and the neonatal deaths.

Perinatal mortality rate: Number of perinatal deaths per 1,000 total births. Total births include live births plus fetal deaths of twenty weeks gestation or more.

EXPLANATORY NOTES

METHODOLOGY USED IN POPULATION ESTIMATES

The subdivision estimates for July 1, 1994 in this report were prepared by the U.S. Bureau of the Census, Federal-State Cooperative Program for Population Estimates, using the Administrative Records method. This is a component method that uses Federal tax data to measure the net intercounty migration of the nongroup quarters population under 65 years old, reported resident birth and death statistics to estimate net natural change, and data on Medicare enrollees to estimate the population 65 years old and over. Tax data are used in the base year and the estimate year to determine the number of persons whose county of residence changed during the period. A net migration rate based on exemptions claimed by the matched cases is applied to the nongroup quarters population under 65 years old. These estimates of migration are then combined with the independent estimates of the population 65 years old and over, inmates of institutions, college students in dormitories, military personnel living in barracks, and the other components of population change (births, deaths, immigration from abroad, and net movement between the military and civilian population) to yield an overall estimate of the total population.

The population 5-17 years of age is estimated based on migration rates calculated from school enrollment data (by age, race and grade) supplied by the Maryland State Department of Education and applied to the "expected" population 5-17 years of age on July 1 of the estimate year. The

"expected" population consists of 1990 census survivors from the date of the census to the estimate date. Race breakdowns are based on changes in public school enrollment of all other races as a proportion of all enrollment since the 1990 census.

The population under five years of age is estimated by race on the basis of adjusted net migration rates for the school age population applied to the "expected" population under five years of age on July 1, 1994.

The "expected" population consists of 1990 census survivors and survivors of births occurring between the date of the census and the estimate date (including corrections for "migration exposure").

The population 65 years of age and over is estimated based on data on Medicare enrollments by race and sex supplied by the Social Security Administration, U.S. Department of Health and Human Services. The changes in the Medicare enrollments for each age-race-sex group for the estimate year are applied to the population estimates of the previous year.

Estimates of the population 18-64 years of age in detailed age groups by race and sex are obtained from driver license statistics. Age and race-specific driver license statistics for males obtained from the Maryland Motor Vehicle Administration are used to estimate the male population aged 18 to 64 years in several stages: 18 to 19, 20 to 24, etc. Sex ratios, based on the 1990 census, are used to estimate the female population. These estimates of the 18-64 population are then adjusted so that the sum of all age groups in each subdivision equals the population estimate for the subdivision. Various adjustments for changes among "special" groups of person, i.e., those in institutions, in the armed forces, or spouses of members of the armed forces are utilized in estimating the various age groups before adjustments are made to the final subdivision estimate.

CAUSE OF DEATH

The ninth revision of the International Classification of Diseases was first used in 1979 for coding the Underlying Cause of Death. The eighth revision had been in use from 1969 to 1978. Because of coding changes in certain categories of causes of death, comparison between the 1991 data and data earlier than 1979 should only be made with reference to coding changes. The National Center for Health Statistics has published comparability ratios for mortality data. This publication is entitled "Estimates of Selected Comparability Ratios Based on Dual Coding of 1976 Death Certificates by the Eighth and Ninth Revisions of the International Classification of Diseases" Monthly Vital Statistics Report, DHEW Publication No. (PHS)80-1120, Vol. 28, No. 11, February 1980.

---

*The definitions of live birth and fetal death are set by law in Section 14 (a) of Article 43 of the Maryland Code, 1957 Edition - Supplement. However, fetal deaths are reportable for filing purposes only if the death occurs after a period of gestation of twenty or more completed weeks (Section 21 (a) or Article 43 supra). Therefore, the fetal deaths included in this report cover only those of twenty or more weeks of gestation.

VITAL STATISTICS HIGHLIGHTS

VITAL
STATISTICS
WEIGHLIGHTS

Highlights of 1994

Population

- The estimated **population** of Maryland in 1994 was 5,006,270, an increase of 1.0% from the year before. The number of white residents increased by 0.5%, while the number of residents of other races increased by 2.2%.

Life expectancy

- The **life expectancy** for an infant born in 1994 was 75.3 years. For whites this figure was 77.1 years and for all other races, 70.9 years.

Births

- There were 73,937 **births** in 1994, 1% fewer than in 1993. The number of births fell by 3% among whites and rose by 2% among women of other races.

- The **birth rate** fell by 2% between 1993 and 1994 to a rate of 14.8 per 1,000 population. The rate declined by 4% among whites and remained stable among other races. Both the number of births and birth rates have been declining in Maryland since 1990.

- Ten percent of all births were to **teen mothers** and 4% were to mothers under the age of 18. Eight percent of births among women of other races were to adolescents below the age of 18.

- Twelve percent of births were to women who had completed fewer than 12 **years of education**.

- **Fourth and higher order births** accounted for 9% of all births.

- In terms of **area of occurrence**, 88% of all births to Maryland residents occurred within the state. Approximately 9% occurred in the District of Columbia and 2% in other states.

- Thirty-four percent of all births were to **unmarried women**. For whites this figure was 19% and for women of other races, 57%. The percentage of births to unmarried women has increased by 16% in the past decade.

- Eighty-seven percent of all women began **prenatal care** during the first trimester of pregnancy. Three percent of births in 1994 were to women who received late (third trimester) or no prenatal care. Among white women this figure was 2%, while among women of other races the figure was 6%. The percentage of women beginning prenatal care in the first trimester increased by 8% in the last ten years.

- The incidence of **low birth weight** was 8% in 1994. This figure includes 6% of white infants and 12% of infants of other races. The incidence of very low birth weight was 2% overall, 1% for whites and 3% for other races. The percentage of low birth weight and very low birth weight infants has been increasing over the past decade.

- Nearly 10% of infants with known **gestational age** were delivered prior to the completion of 37 weeks of gestation. This figure was 8% for whites and 13% for other races.

- In 1994 nearly 3% of all births were twin or higher order births. The percentage of **multiple births** has increased by 26% in the past 10 years.

- Twenty-three percent of infants were delivered by **cesarean section** during 1994, an increase of 2% over the 1993 figure.

Fetal and infant deaths

- The **fetal death rate** in 1994 was 8.5 per 1,000 total deliveries. Among whites this figure was 6.9 and among other races, 9.6.
- The **infant mortality rate** was 8.8 per 1000 live births in 1994, a decline of 10% from 1993. The

rate was 6.0 for whites and 13.4 for other races, declines of 2% and 17%, respectively, from the year before.

- The **neonatal mortality rate** was 6.0 per 1000 live births for all infants, 4.1 for whites and 9.1 for all other races. The rate for whites declined by 2% between 1993 and 1994 while the rate for other races fell by 19%.

- The **postneonatal mortality rate** was 2.8 per 1000 live births in 1994. The rate was 1.9 for whites and 4.3 for infants of other races. Rates for all groups declined in the past year.

Deaths

- There were 40,939 **deaths** among Maryland residents in 1994 compared with 40,332 in the year before.

- The **age-adjusted mortality rate** was 530.6 per 100,000 population, a slight decline from the 1993 rate. Age-adjusted rates declined for all race-sex groups except females of other races; the rate increased by 1% among this group.

- The largest increase in the **age-specific death rate** occurred among persons ages 35-44 years. The mortality rate among this age group rose by 6%, with large increases among white males and females of other races. The largest decline in the age-specific death rate occurred among children 1-4 years of age; the death rate among this group fell by 17% from the year before.

- **Heart disease** was the leading cause of death in 1994. The age-adjusted mortality rate was 137.8 per 100,000 population, 3% lower than the rate in 1993 and 27% lower than the rate a decade ago. Rates are highest among males of other races.

- The second leading cause of death in 1994 was **malignant neoplasms,** responsible for 10,060 deaths. The overall age-adjusted mortality rate for malignant neoplasms was 140.9 per 100,000 population in 1994, with the rates highest among males of other races.

- **Cerebrovascular disease** was the third leading cause of death in 1994 with an age-adjusted mortality rate of 26.1 per 100,000 population. Despite a 17% decline in the age-adjusted death rate in the past decade, the rates have been increasing over the last several years.

- **Chronic obstructive pulmonary diseases** were the fourth leading cause of death in 1994. The age-adjusted mortality rate was 19.8 per 100,000 population, an increase of 4% from the year before. Rates have increased by 18% since 1984.

- **Accidents and adverse effects** were the fifth leading cause of death in 1994, contributing 1,340 deaths. **Motor vehicle accidents** were responsible for 651 or nearly half of all accidental deaths. Falls accounted for the largest number of non-vehicular accidental deaths.

- The sixth leading cause of death in 1994 was **diabetes mellitus.** The age-adjusted mortality rate was 17.4 per 100,000 population, an increase of 5% from the 1993 rate. There has been a 69% increase in the age-adjusted mortality rate for diabetes in the last decade.

- **Human immunodeficiency virus** rose from the eighth to the seventh leading cause of death in 1994. There were 1,216 deaths resulting from HIV in 1994 compared with 1,009 deaths in 1993. The overall age-adjusted mortality rate was 21.9 per 100,000 population, a 19% increase over the 1993 rate and a 321% increase over the rate in 1988. HIV is the leading cause of death among persons between the ages of 25 and 44. Although males of other races continue to have the highest age-adjusted mortality rate (95.8 per 100,000 population in 1994), the greatest increase in rates between 1993 and 1994 occurred among females of other races. The rate for this group rose from 16.4 in 1993 to 25.9 in 1994, an increase of 58%.

- **Pneumonia and influenza** were responsible for 1,186 deaths in 1994. The age-adjusted mortality rate was 11.6 per 100,000 population, a 7% decline from the rate in 1993. The rate was

highest among males of other races.

- There were 645 **homicides** among Maryland residents in 1994 for an age-adjusted mortality rate of 13.8 per 100,000 population. Males of other races had the highest age-adjusted mortality rate (60.1 in 1994), a figure 11 times the rate among white males. The age-adjusted mortality rate for homicide has increased by 60% in the past decade, and homicide is the leading causes of death among Maryland residents ages 15-24 years.

- The age-adjusted mortality rate for **septicemia** was 6.8 per 100,000 population in 1994. The highest rates are found among males of other races.

- There were 520 **suicides** among Maryland residents in 1994 for an overall age-adjusted mortality rate of 9.6 per 100,000 population. Rates are considerably higher among males than among females. Suicide is the third leading cause of death among adolescents and young adults ages 15-24.

- There were eleven **maternal deaths** in 1994, compared with seven in 1993.

- In terms of **place of occurrence**, 93% of all deaths among Maryland residents occurred within the state. Of those deaths occurring out of state, 59% took place in the District of Columbia.

Marriages

- There were 43,302 **marriages** in Maryland in 1994. Thirty-five percent of both brides and grooms were previously married. Seventy-nine grooms and 449 brides were under the age of 18.

Divorces

- There were 16,759 **divorces and annulments** in 1994. The majority of persons divorcing had been married between four and nine years, and approximately 42% had children under the age of 18.

TABLE 43A. THE EIGHT* LEADING CAUSES OF DEATH BY AGE, MARYLAND, 1994.

Under 1 year

Rank		Number	Percent
	All Causes	652	100.0
1.	Perinatal Conditions (760-779)	350	53.7
2.	Congenital Anomolies (740-759)	115	17.6
3.	Sudden Infant Death Syndrome (7980)	67	10.3
4.	Accidents and Adverse Effects (800-949)	19	2.9
4.	Diseases of the Heart (390-398, 402, 404-429)	19	2.9

1-4 years

Rank		Number	Percent
	All Causes	113	100.0
1.	Accidents and Adverse Effects (800-949)	31	27.4
2.	Malignant Neoplasms (140-208)	13	11.5

5-14 years

Rank		Number	Percent
	All Causes	156	100.0
1.	Accidents and Adverse Effects (800-949)	59	37.8
2.	Malignant Neoplasms (140-208)	18	11.5
3.	Homicide (960-978)	14	9.0

15-24 years

Rank		Number	Percent
	All Causes	656	100.0
1.	Homicide (960-978)	237	36.1
2.	Accidents and Adverse Effects (800-949)	179	27.3
3.	Suicide (950-959)	73	11.1
4.	Malignant Neoplasms (140-208)	25	3.8
5.	Human Immunodeficiency Virus (042-044)	23	3.5
6.	Diseases of the Heart (390-398, 402, 404-429)	18	2.7

25-44 years

Rank		Number	Percent
	All Causes	3,722	100.0
1.	Human Immunodeficiency Virus (042-044)	896	24.1
2.	Malignant Neoplasms (140-208)	424	11.4
3.	Diseases of the Heart (390-398, 402, 404-429)	390	10.5
4.	Accidents and Adverse Effects (800-949)	359	9.6
5.	Homicide (960-978)	296	8.0
6.	Suicide (950-959)	235	6.3
7.	Cerebrovascular Disease (430-438)	85	2.3
8.	Chronic Liver Disease and Cirrhosis (571)	75	2.0

45-64 years

Rank		Number	Percent
	All Causes	7,454	100.0
1.	Malignant Neoplasms (140-208)	2,723	36.5
2.	Diseases of the Heart (390-398, 402, 404-429)	1,983	26.6
3.	Diabetes Mellitus (250)	306	4.1
4.	Cerebrovascular Disease (430-438)	280	3.8
5.	Human Immunodeficiency Virus (042-044)	266	3.6
6.	Accidents and Adverse Effects (800-949)	224	3.0
7.	Chronic Obstructive Pulmonary Diseases (490-49	197	2.6
8.	Chronic Liver Disease and Cirrhosis (571)	171	2.3

65 years and over

Rank		Number	Percent
	All Causes	28,142	100.0
1.	Diseases of the Heart (390-398, 402, 404-429)	9,555	34.0
2.	Malignant Neoplasms (140-208)	6,850	24.3
3.	Cerebrovascular Disease (430-438)	2,140	7.6
4.	Chronic Obstructive Pulmonary Diseases (490-49	1,436	5.1
5.	Pneumonia and Influenza (480-487)	1,022	3.6
6.	Diabetes Mellitus (250)	956	3.4
7.	Septicemia (038)	485	1.7
8.	Accidents and Adverse Effects (800-949)	466	1.7

*Leading causes are shown only if there were ten or more deaths in a given age group.

TABLE 43B. THE EIGHT* LEADING CAUSES OF DEATH BY RACE AND AGE, MARYLAND, 1994.

White, under 1 year

Rank		Number	Percent
	All Causes	272	100.0
1.	Perinatal Conditions (760-779)	120	44.1
2.	Congenital Anomolies (740-759)	78	28.7
3.	Sudden Infant Death Syndrome (7980)	31	11.4
4.	Diseases of the Heart (390-398, 402, 404-429)	10	3.7
5.	Accidents and Adverse Effects (800-949)	7	2.6

All other races, under 1 year

Rank		Number	Percent
	All Causes	380	100.0
1.	Perinatal Conditions (760-779)	230	60.5
2.	Congenital Anomolies (740-759)	37	9.7
3.	Sudden Infant Death Syndrome (7980)	36	9.5
4.	Accidents and Adverse Effects (800-949)	12	3.2
5.	Diseases of the Heart (390-398, 402, 404-429)	9	2.4
6.	Homicide (960-978)	5	1.3
6.	Nephritis, Nephrotic Synd. & Nephrosis (580-589)	5	1.3

White, 1-4 years

Rank		Number	Percent
	All Causes	53	100.0
1.	Accidents and Adverse Effects (800-949)	13	24.5
2.	Malignant Neoplasms (140-208)	10	18.9

All other races, 1-4 years

Rank		Number	Percent
	All Causes	60	100.0
1.	Accidents and Adverse Effects (800-949)	18	30.0
2.	Human Immunodeficiency Virus (042-044)	8	13.3
3.	Congenital Anomolies (740-759)	6	10.0

White, 5-14 years

Rank		Number	Percent
	All Causes	84	100.0
1.	Accidents and Adverse Effects (800-949)	33	39.3
2.	Malignant Neoplasms (140-208)	15	17.9
3.	Congenital Anomolies (740-759)	5	6.0

All other races, 5-14 years

Rank		Number	Percent
	All Causes	72	100.0
1.	Accidents and Adverse Effects (800-949)	26	36.1
2.	Homicide (960-978)	12	16.7

White, 15-24 years

Rank		Number	Percent
	All Causes	289	100.0
1.	Accidents and Adverse Effects (800-949)	126	43.6
2.	Suicide (950-959)	49	17.0
3.	Homicide (960-978)	23	8.0
4.	Malignant Neoplasms (140-208)	16	5.5
5.	Diseases of the Heart (390-398, 402, 404-429)	10	3.5
6.	Human Immunodeficiency Virus (042-044)	5	1.7

All other races, 15-24 years

Rank		Number	Percent
	All Causes	367	100.0
1.	Homicide (960-978)	214	58.3
2.	Accidents and Adverse Effects (800-949)	53	14.4
3.	Suicide (950-959)	24	6.5
4.	Human Immunodeficiency Virus (042-044)	18	4.9
5.	Malignant Neoplasms (140-208)	9	2.5
6.	Diseases of the Heart (390-398, 402, 404-429)	8	2.2

White, 25-44 years

Rank		Number	Percent
	All Causes	1,594	100.0
1.	Accidents and Adverse Effects (800-949)	246	15.4
2.	Malignant Neoplasms (140-208)	235	14.7
3.	Diseases of the Heart (390-398, 402, 404-429)	196	12.3
4.	Human Immunodeficiency Virus (042-044)	184	11.5
5.	Suicide (950-959)	174	10.9
6.	Homicide (960-978)	67	4.2
7.	Chronic Liver Disease and Cirrhosis (571)	38	2.4
8.	Cerebrovascular Disease (430-438)	35	2.2

All other races, 25-44 years

Rank		Number	Percent
	All Causes	2,128	100.0
1.	Human Immunodeficiency Virus (042-044)	712	33.5
2.	Homicide (960-978)	229	10.8
